PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 1 year of hands-on experience designing, developing, and deploying scalable web applications using React.js, JavaScript, .NET, and MySQL. Proven track record delivering robust enterprise software solutions, including warehouse inventory platforms, internal HR management systems, and direct-to-consumer e-commerce portals. Skilled in building responsive UI components, integrating RESTful APIs, and optimizing database schema architectures. Adept at transforming complex business requirements into high-performing, user-centric web platforms.

TECHNICAL SKILLS

Frontend:	React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design, Component Architecture
Backend & Database:	.NET, RESTful API Development, MySQL, MySQL Workbench
Tools & Workflow:	Git, GitHub, Visual Studio Code, Version Control, Postman

WORK EXPERIENCE

Full Stack Developer

September 2025 – Present

Pirnav Software Solutions — *Hyderabad, Telangana*

Inventory Management System (Warehouse & Supply Chain Software)

- Architected and implemented dynamic, responsive user interface dashboards using React.js and CSS3, enabling real-time stock tracking across multiple warehouse locations.
- Developed secure backend API endpoints in .NET to handle complex inventory transactions, purchase orders, and automated stock replenishment workflows.
- Designed and optimized MySQL database schemas, writing efficient queries and indexing strategies that reduced data retrieval times for large inventory datasets by 25%.
- Integrated client-side state management with backend APIs to ensure seamless live synchronization between stock updates and administrative inventory reports.

Employee Management System (EMS)

- Engineered an end-to-end internal HR application to streamline the full employee lifecycle, including onboarding, attendance tracking, and performance record management.
- Created modular, reusable React UI components to manage employee directory grids, custom form validations, and interactive profile view screens.
- Built RESTful services in .NET to enforce role-based access control (RBAC), ensuring sensitive HR and personnel data was restricted to authorized roles.
- Automated administrative workflows by linking relational MySQL tables, cutting down manual HR record processing time by 30%.

Honeywell Products E-Commerce Platform

- Developed a direct-to-consumer e-commerce portal specializing in CCTV security systems and solar energy products using React.js and .NET.
- Implemented product filtering, dynamic detail views, and interactive cart/checkout flows to enhance end-user experience and website navigation.
- Constructed relational database tables in MySQL Workbench to manage product catalogs, inventory SKUs, customer records, and order transaction logs.

- Conducted cross-browser compatibility testing and mobile-first CSS responsiveness optimizations, resulting in a seamless shopping experience across all device screen sizes.

EDUCATION

Bachelor of Technology (B.Tech) - 69% — Vignana Bharathi Institute of Technology | 2023

Diploma in Engineering - 65% — Govt Polytechnic, Yadagirigutta | 2020

Secondary School Certificate (SSC) - CGPA: 7.5 — Vidhya Jyothi High School | 2017
